Eighth Special Issue on Linear Algebra and Statistics

S. Puntanen, G.P.H. Styan and H.J. Werner
Preface 1

J.K. Baksalary and O.M. Baksalary
Idempotency of linear combinations of two idempotent matrices . . . 3

A. Ben-Israel
An application of the matrix volume in probability 9

K.-T. Fang, T. Kollo and A.-M. Parring
Approximation of the non-null distribution of generalized T^2-statistics 27

D.-D. Gao and R.-B. Huang
Some results on canonical correlation and their applications to a linear model 47

G.A. Ghazal and H. Neudecker
On second-order and fourth-order moments of jointly distributed random matrices: a survey 61

D.A. Griffith
Eigenfunction properties and approximations of selected incidence matrices employed in spatial analyses 95

J. Groß
The Moore–Penrose inverse of a partitioned nonnegative definite matrix 113

J. Groß
Nonnegative-definite and positive-definite solutions to the matrix equation $\mathbf{AXA}^* = \mathbf{B}$ – revisited 123

J. Groß and S. Puntanen
Estimation under a general partitioned linear model 131

D.A. Harville
Simple derivations for two Jacobians of basic importance in multivariate statistics 145

K. Hayashi and P.M. Bentler
The asymptotic covariance matrix of maximum-likelihood estimates in factor analysis: the case of nearly singular matrix of estimates of unique variances 153

Table of Contents continues

Table of Contents continued

E.M. Hodgess and W.W.S. Wei
Temporal disaggregation of stationary bivariate time series 175

A. Klein
A generalization of Whittle's formula for the information matrix of vector-mixed time series 197

A. Klein, G. Mélard and T. Zahaf
Construction of the exact Fisher information matrix of Gaussian time series models by means of matrix differential rules 209

A. Klein and H. Neudecker
A direct derivation of the exact Fisher information matrix of Gaussian vector state space models 233

A. Kobilinsky
Reparametrisation of interest in non-uniform factorial designs 239

C.-K. Li
A simple proof of the Craig–Sakamoto theorem 281

M. Omladič and V. Omladič
More on restricted canonical correlations 285

F. Öztürk and F. Akdeniz
Ill-conditioning and multicollinearity 295

C.R. Rao
Statistical proofs of some matrix inequalities 307

C. Stępniak
On a matrix result in comparison of linear experiments 321

Y. Tian
Completing triangular block matrices with maximal and minimal ranks. 327

M. van de Velden and H. Neudecker
On an eigenvalue property relevant in correspondence analysis and related methods 347

H.D. Vinod
Foundations of multivariate inference using modern computers 365

B.-X. Zhang and X.-H. Zhu
Gauss–Markov and weighted least-squares estimation under a general growth curve model 387

Table of Contents continues

Table of Contents continued

F. Zhang
Schur complements and matrix inequalities in the Löwner ordering . . . 399
Author index to volume 321 411
